

FORMULATION SERVICES

Aurigene Pharmaceutical Services offers end-to-end formulation development and manufacturing services ranging from pre-formulations, clinical development, clinical supplies to commercial manufacturing. We have state-of-the-art infrastructure and diverse experience to develop and manufacture formulations to support oral, topical and parenteral dosage forms. Our formulation development efforts are focused on developing the best formulation for your molecule, with the desired bioavailability and optimal stability.

Our regulatory team are here to provide dossiers for IND, NDA filings in the US and IMPD, MAA in Europe and can also help preparing briefing packages for meetings with agencies during the development phases.

We offer in time and in full commercial manufacturing for formulations from our cGMP sites in India and Shreveport in the US.
